Short Biography

Member of "Cereals Research Group" of the Department of Plant Breeding and Genetics, Lasbela University of Agriculture, Water and Marine Sciences, Uthal, District Lasbela, Balochistan, Pakistan My current interests are focused on the expression of stress proteins and other stress related primary and secondary metabolites under water, salinity, heat and heavy metal stresses, and finding strategies to fetch greater yields under such conditions to improve wheat crop. I am also involved in the improvement of wheat germplasm for per acre yield according to the standards prescribed by various agencies in Pakistan.
